

THE DIRECTOR OF  
CENTRAL INTELLIGENCE

National Intelligence Council

7 March 83

NOTE FOR: Richard Perle, Ass't Secretary  
(ISP)

FROM : Harry Rowen, Chairman/NIC

The attached paper by Albert Wohlstetter is much the best treatment of the morality of nuclear deterrence -- including the current controversy on the Catholic bishops' statement -- that I have come across. To be sure it is long, but on the other hand it is very carefully reasoned. Good reading for an airplane trip.
